## **PROJECTS**

### **JBMDL SAFETY DATA ANALYSIS PROGRAM**

**Pride Industries**

**Jan 2021**

Developed an excel based analytical tool to track all safety audits and determine area's of deficiency based on trends in safety violations. The goal was to become more proactive in incident prevention and train employees based on observed safety violation trends.

### **JBMDL SITE HEARING CONSERVATION PROGRAM**

**Pride Industries**

**May 2021**

Discovered, contracted and implemented a software that enables designated personnel to perform annual hearing conservation tests. Using this software and equipment we can use an app to take the hearing tests our selves the results are then remotely analyzed by a doctor and returned. This program brought our site from 81% to 100% program compliance.

### **Ames, Iowa Real Estate Portfolio Value Add Market Analysis**

**General Assembly**

**October 2021**

Using thousands of publicly available transactions in the Ames, Iowa Real Estate Market, I statistically modeled the property features to gain insight into the main attributes that dictate prices in the region. This information is perfect for finding the most cost effective ways to add value to a Real Estate Portfolio in the market or any market I have data on.

### **Natural Language Processing AI Song Recommendation APP**

**General Assembly**

**September 2021**

Using 150,000+ songs I created an executable app that allows users to input text (either song lyrics or a mood description) to find songs that are similar or that will positively boost your mood using TensorFlow Machine Learning and NLP AI Technology.

### **Proper Jab Form Detection App Using Computer Vision, AI & ML**

**General Assembly**

**November 2021**

Using a Full Python Stack, Git, and Heroku I created a light-weight web-app that connects to your camera and counts proper jabs on live video. This is made possible using an AI model which projects your skeleton onto the camera, then the image goes through a TensorFlow Machine Learning Model that indicates if your technique was correct or not in real-time.
